Dr. William F. Cantrell
Laboratory of Parasite Chemotherapy
National Institute of Allergy and Infectious Diseases
National Institutes of Health
Bethesda 14, Maryland

Dear Dr. Cantrell:

I am sorry that I cannot suggest anyone who would be able to undertake the investigation of genetics of malaria parasites, as you asked in your letter of July 16. However, you might wish to ask Dr. Bruce Stocker of the Lister Institute (Chelsea Bridge Road, London S.W. 1, England) about his contacts in the London School of Hygiene. Also, perhaps Dr. T. M. Sonneborn of the University of Indiana or Dr. R. Kimball at Oak Ridge National Laboratory would be able to offer suggestions. Their full addresses are:

Dr. T. M. Sonneborn
Department of Zoology
University of Indiana
Bloomington, Indiana

Dr. R. Kimball
Biological Division
Oak Ridge National Laboratory
Box P
Oak Ridge, Tennessee

I hope that one of these men can provide you with suggestions for a candidate to undertake this study.

Sincerely yours,

Joshua Lederberg
Professor of Genetics
